ABOUT ELECTRIKA INC.

Industrial electrical supply, since 1999

Electrika Inc. is an industrial electrical supply partner based in Gurgaon, Haryana. We supply builders, architects, consultants, contractors and plant teams with electrical products from established manufacturers, alongside project-specific assemblies built to client drawings.

This portfolio summarises the product categories we supply. Specific models, ratings and availability are confirmed against each enquiry and the manufacturer's current documentation.

Led by Pramod Aggarwal, Founder & Managing Director — over 25 years in the electrical industry, with expertise in industrial power distribution layout, electronics and air-conditioning systems.

25+ YEARS IN ELECTRICAL SUPPLY

18 AUTHORISED & ASSOCIATED BRANDS

10 PRODUCT CATEGORIES

OUR CORE PROMISE

"Providing the latest and best electrical products to our customers, with an eye on the right products at the right time and the right price — building permanent business relationships on quality and technical excellence."

WHAT WE OFFER

01

Multi-brand supply

Products from established Indian and international manufacturers, sourced to project specifications, approved make lists and BOQs.

02

Technical selection

Support with product selection, load requirements and specification matching for consultants, contractors and plant teams.

03

Custom assemblies

Junction boxes, ACDB/DCDB, socket boards and panel enclosures configured to approved client drawings.

WHO WE SUPPLY

Industrial plants & warehouses
Manufacturing units, utilities and logistics facilities

EPC & infrastructure contractors
Roads, campuses, public lighting and utility works

Government & public works
Departments, PSUs and engineering services

Electrical consultants & contractors
Specification-led supply to approved makes

Architects & builders
Commercial, institutional and residential projects

Purchase & facility teams
Planned procurement and maintenance requirements

CONTENTS

Product categories

01 **Wires & Power Cables** — 04
LT and HT power cables, control, flexible and submersible cables

02 **Industrial & Conventional Lighting** — 05
LED floodlights, high-bays, industrial and street lighting

03 **Switchgear & Electrical Panels** — 06
MCB, MCCB, ACB, distribution boards, ACDB/DCDB, control panels

04 **Cable Trays & Conduits** — 07
Perforated and ladder trays, UPVC and rigid conduits, fittings

05 **Flameproof Equipment** — 08
Luminaires, junction boxes and control stations for hazardous areas

06 **Weatherproof Enclosures & Junction Boxes** — 09
Hensel junction boxes, switchgear and isolator enclosures

07 **Lighting Poles & High Masts** — 11
GI octagonal, high mast, floodlight, flag mast and solar poles

08 **Solar Supporting Products** — 13
Mounting structures, AJB, ACDB/DCDB, earthing, ESE arresters

09 **Industrial Connectors & Accessories** — 14
PCE plugs and sockets, heavy-duty connectors, cable reels

10 **Custom Fabrication & Project Supply** — 15
Assemblies to client drawings and consolidated BOQ supply

16 **Associated Brands**

17 **Industries & Clients**

Specifications shown are limited to information verified against product markings or manufacturer documentation. Exact models, ratings and availability are confirmed at the time of quotation.

CATEGORY 01

Wires & Power Cables

01

Power, control and flexible cables for building services, industrial plants and infrastructure projects. Cables are supplied to the voltage grade, core count, conductor size and armouring specified in the project BOQ, from manufacturers' standard ranges.

Illustrative cross-section of a 4-core armoured LT cable — not to scale

OUTER SHEATH
Overall mechanical and environmental protection

CONDUCTOR
Copper or aluminium, solid or stranded

INSULATION
PVC or XLPE, colour-coded cores

INNER SHEATH
Bedding over the laid-up cores

ARMOUR
Galvanised steel wire or strip (armoured cables)

LT Power Cables

Armoured and unarmoured cables for power distribution in plants, buildings and outdoor runs, in single and multi-core constructions.

SPECIFY Conductor, insulation, armour, cores, size, voltage

HT Power Cables

Medium-voltage cables for substations, feeders and utility connections, supplied against the project's voltage grade and approved make list.

SPECIFY Voltage grade, conductor, cores, size, armour

Control Cables

Multi-core cables for control, interlock and signalling circuits in panels and plant equipment. Screened versions on request.

SPECIFY Number of cores, size, screening, armouring

Flexible Cables & Building Wires

Single and multi-core flexible cables and house wiring for distribution boards, equipment connections and internal wiring.

SPECIFY Cores, size, insulation, colour, coil or drum length

Submersible Cables

Flat and round cables for submersible pump installations in borewells and water-supply schemes.

SPECIFY Flat or round, cores, size, length

For an accurate quotation

Share cable type, voltage grade, conductor material, cores, cross-section, armouring, required lengths and the project's approved makes.

TYPICAL APPLICATIONS

Industrial plants · Commercial buildings · Substations & feeders · Pumping stations · Infrastructure works

ASSOCIATED BRANDS

Polycab · KEI Cables

CATEGORY 02

Industrial & Conventional Lighting

02

LED and conventional lighting for industrial floors, warehouses, outdoor areas and commercial buildings. Luminaires are selected by wattage, light distribution, IP rating and mounting arrangement to suit each application.

LED floodlight (Bajaj) — photographed from stock

LED Floodlights

For facades, yards, sports areas and high-mast installations. Supplied with the mounting bracket and beam distribution to suit the application.

SPECIFY Wattage, beam angle, IP rating, mounting, colour temperature

LED High-Bay Lights

For factories, warehouses and high-ceiling spaces, selected to the mounting height and the lux level required on the working plane.

SPECIFY Wattage, mounting height, optics, suspension type

Industrial Luminaires

Well-glass, bulkhead and batten fittings for plant areas, utility spaces and covered walkways.

SPECIFY Type, wattage, IP rating

Street & Outdoor Lighting

LED street lights and outdoor fittings, compatible with the GI octagonal poles in Category 07.

SPECIFY Wattage, optics, pole spigot size

Conventional Lighting

Conventional lamps, fittings and accessories for routine replacement and maintenance requirements.

SPECIFY Lamp type, cap, wattage

DATASHEET-CONFIRMED SPECIFICATIONS

Wattage, efficacy (lm/W), colour temperature, IP rating and beam angle are taken from the manufacturer's datasheet for the specific model quoted, and shared with every offer.

TYPICAL APPLICATIONS

Factories & warehouses | Yards & parking | Roads & campuses | Sports areas | Facades | Utility areas

ASSOCIATED BRANDS

Bajaj | Halonix | Surya | Crompton | Havells

CATEGORY 03

Switchgear & Electrical Panels

03

Protection and distribution products for LT installations, from final-circuit MCBs to incomers and distribution boards. Standard products come from manufacturers' ranges; panel assemblies are built to approved drawings (see Category 10).

Meter distribution assembly in Hensel enclosures

MANUFACTURER RANGES

Standard products

- MCBs, MCCBs and ACBs
- Distribution boards
- Ratings per manufacturer catalogue
- Supplied to approved make list

BUILT TO APPROVED DRAWINGS

Custom assemblies

- ACDB / DCDB
- Control and distribution panels
- Configured to SLD and GA drawings
- Make and rating of each component agreed

SELECTION GUIDE

PRODUCT	TYPICAL APPLICATION	SPECIFY WHEN ENQUIRING
MCB	Final-circuit protection for lighting and power circuits	Rating (A), poles, tripping curve, breaking capacity (kA)
MCCB	Feeder and incomer protection in distribution panels	Frame size, rating, breaking capacity, release type
ACB	Main incomers for large LT installations	Rating, breaking capacity, fixed or draw-out, protection release
Distribution boards	SPN and TPN boards for building and plant distribution	Number of ways, incomer type, enclosure and IP rating
ACDB / DCDB	AC and DC distribution for solar PV systems	Approved SLD, string count, protection devices, enclosure
Control panels	Motor control, lighting control and distribution panels	SLD / GA drawing, component makes, enclosure finish

TYPICAL APPLICATIONS

LT distribution | Building services | Plant electrification | Solar PV systems | Motor control

ASSOCIATED BRANDS

Schneider Electric | Havells

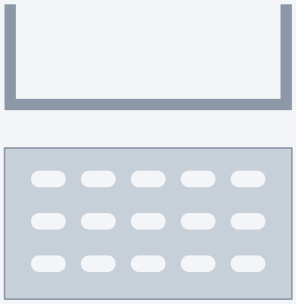

CATEGORY 04

Cable Trays & Conduits

04

Cable support and containment for industrial plants, commercial buildings and infrastructure. Trays and conduits are supplied in standard sizes or fabricated to project dimensions, with matching bends, tees, reducers and supports.

Illustrative profiles — not to scale

PERFORATED TRAY
Section and plan

LADDER TRAY
Plan view: side rails and rungs

CONDUIT
Section and coupler

Perforated Cable Trays

For control and power cables in plant and building runs, in MS, pre-galvanised or hot-dip galvanised finish.

SPECIFY Width, side height, thickness, finish

Ladder Cable Trays

For heavy power cables and long horizontal runs where ventilation and cable access matter.

SPECIFY Width, side height, rung spacing, finish

UPVC Conduits

Rigid PVC conduit pipes and fittings for concealed and surface wiring in buildings.

SPECIFY Diameter, grade, fittings

Rigid Conduits

Rigid conduit pipes and fittings for exposed runs that need mechanical protection.

SPECIFY Diameter, material, wall thickness

Tray & Conduit Fittings

Bends, tees, reducers, couplers, covers, brackets and hangers matched to tray and conduit sizes.

SPECIFY Type, size, quantity per run

Representative image

Specifications. Width, side height, sheet thickness and finish are fixed per project. Load data is confirmed from the fabricator's documentation before supply.

TYPICAL APPLICATIONS

Industrial plants | Substations | Commercial buildings | Data & control rooms | Infrastructure

CATEGORY 05

Flameproof Equipment

05

Electrical equipment for areas where flammable gases, vapours or dusts may be present. Every item is selected against the site's hazardous-area classification and quoted with the manufacturer's certification details.

Flameproof Luminaires

Well-glass and flood-type fittings for lighting in classified areas.

SPECIFY Zone, gas group, temperature class, wattage

Flameproof Junction Boxes & Enclosures

Cast enclosures for cable termination, branching and housing of control devices.

SPECIFY Zone, gas group, size, number and size of entries

Flameproof Control Stations

Push-button stations and local control units for motors and process equipment.

SPECIFY Zone, gas group, number of elements, entries

BEFORE WE QUOTE

Information required for every hazardous-area item

1. Area classification (zone)
2. Gas or dust group
3. Temperature class
4. Certification and approvals required
5. Ingress protection and enclosure material

OUR APPROACH

Flameproof equipment is quoted against the manufacturer's certificate and nameplate data for the exact model offered. Zone suitability, gas group and temperature class are confirmed in writing with each offer, and no equipment is substituted without the client's written approval.

SHARED WITH EVERY OFFER

Certificate reference

Manufacturer's certificate details for the exact model offered

Marking details

Nameplate data: protection type, gas group and temperature class

Product datasheet

Construction, dimensions and cable entry details

TYPICAL APPLICATIONS

- Refineries & petrochemicals
- Chemical & pharmaceutical plants
- Paint shops & spray booths
- Fuel stations & storage depots
- Gas installations

ASSOCIATED BRANDS

SUDHIR FLP

CATEGORY 06

Weatherproof Enclosures & Junction Boxes

06

Junction boxes and enclosures for outdoor, washdown and dusty environments, from compact cable junction boxes to multi-compartment distribution enclosures.

Hensel junction boxes, switchgear enclosures and industrial connectors

HENSEL KF SERIES JUNCTION BOXES

Material	Polycarbonate
Ingress protection	IP66 / IP67 / IP69 (as marked on the product)
Colours	Grey, black
Example sizes (L × W × H)	93 × 93 × 62 mm · 180 × 130 × 77 mm 210 × 155 × 92 mm · 295 × 225 × 122 mm
Versions	Empty, or fitted with terminal blocks

Exact part number, size and terminal configuration are confirmed at enquiry.

TYPICAL USES

- Outdoor lighting circuits
- Building services and facades
- Washdown and process areas
- Solar array junctions
- Machine and conveyor wiring

ASSOCIATED BRANDS

Hensel

CATEGORY 06 · CONTINUED

Enclosures for switchgear, isolation and distribution

06

Hensel enclosures with rotary isolator and industrial sockets

Switchgear Enclosures

Enclosures with hinged transparent windows for MCBs, RCCBs and isolators, in single or combined units.

SPECIFY Number of modules, IP rating, cable entries

Isolator Enclosures

Enclosed rotary isolators for local isolation of motors, pumps and outdoor equipment.

SPECIFY Current rating, poles, enclosure size

Cable Junction Boxes

Compact boxes for cable branching and termination in outdoor and industrial installations.

SPECIFY Size, entries, terminals

Industrial Enclosures

Larger polycarbonate enclosures for control gear, terminal blocks and distribution assemblies.

SPECIFY Dimensions, mounting plate, IP rating

UNDERSTANDING IP RATINGS (IEC 60529)

IP66

Dust-tight. Protected against powerful water jets from any direction.

IP67

Dust-tight. Protected against temporary immersion in water.

IP69

Dust-tight. Protected against high-pressure, high-temperature water jets, as used in washdown cleaning.

The first digit (6) denotes protection against dust; the second digit denotes protection against water.

TYPICAL APPLICATIONS

Outdoor installations · Washdown areas · Industrial plants · Solar installations · Building services

ASSOCIATED BRANDS

CATEGORY 07

Lighting Poles & High Masts

07

Galvanised steel poles and masts for street, area, sports and landmark lighting. Poles are supplied to project drawings, with heights, sections, base plates and brackets confirmed before fabrication.

Representative images

GI Octagonal Poles

Tapered octagonal street light poles for roads, campuses and industrial estates, with single or double-arm brackets.

SPECIFY Height, arm type, base plate

High Mast Lighting Poles

Multi-section masts with luminaire rings for junctions, yards, stadiums and large open areas.

SPECIFY Height, number of fittings, ring type

Floodlight Poles

Poles with cross-arm or ring brackets for floodlight mounting at sports and storage areas.

SPECIFY Height, bracket type, fittings

Flag Mast Poles

Tall masts for national flag installations at public, institutional and corporate sites.

SPECIFY Height, flag size, location

Solar Street Light Poles

Poles with module brackets for standalone solar street lighting (see Category 08).

SPECIFY Height, module size, arm

Customised Poles

Special heights, sections, brackets and finishes to approved project drawings.

SPECIFY Drawing or reference design

Project-specific by design. Final dimensions and specifications are subject to approved drawings and project requirements. See the specification framework overleaf.

TYPICAL APPLICATIONS

Roads & highways | Industrial estates | Campuses & townships | Stadiums & sports areas | Public landmarks

ASSOCIATED BRANDS

CATEGORY 07 · CONTINUED

07

Pole specification framework

Every pole is defined by the parameters below. Values are fixed on the approved drawing for each project rather than taken from a standard catalogue.

Illustrative elevation — not to scale

PARAMETER	DEFINED ON THE APPROVED DRAWING
Height	Overall height above base plate (m)
Section	Octagonal or polygonal; top and bottom across-flats (mm)
Wall thickness	Sheet thickness per section (mm)
Material & finish	Steel grade and galvanising, as specified on the drawing
Base plate	Size, thickness and bolt pitch circle
Foundation bolts	Number, diameter, length and template
Brackets	Single or double arm, cross-arm or luminaire ring
Luminaire fit	Spigot size and number of fittings per pole

FOR A POLE QUOTATION, PLEASE SHARE

- Pole type, height and quantity
- Drawing or reference specification, if available
- Bracket and luminaire details
- Site location and delivery point
- Foundation bolts and template requirement

Final dimensions, sections and foundation details are subject to approved drawings and project requirements. Structural and wind-load design is confirmed by the fabricator or the project consultant for each order.

CATEGORY 08

Solar Supporting Products

08

Balance-of-system and solar lighting products for rooftop and ground-mounted installations, configured to the system design and approved drawings.

Representative images

Solar Mounting Structures

GI structures for rooftop and ground-mounted arrays, to the project layout.

SPECIFY Module size, tilt, roof or ground type

Array Junction Boxes (AJB)

Weatherproof boxes for string combining and protection, configured to the system design.

SPECIFY Strings, protection, enclosure

ACDB / DCDB

AC and DC distribution boxes for PV systems, built to the approved SLD.

SPECIFY System rating, SLD

Chemical Earthing

Earthing electrodes and compound for system and equipment earthing.

SPECIFY Electrode size, number of pits

ESE Lightning Arresters

Early streamer emission lightning protection for rooftops and open installations.

SPECIFY Protection radius, mast height

Solar Street & Mast Lighting

Standalone solar street lights and solar high-mast systems, with poles from Category 07.

SPECIFY Luminaire, module, battery, pole

System-specific ratings. Module, battery, luminaire and protection ratings are confirmed for each system design from the manufacturer's datasheets.

TYPICAL APPLICATIONS

Rooftop solar | Ground-mounted plants | Street & campus lighting | Remote sites | Industrial rooftops

CATEGORY 09

Industrial Connectors & Accessories

09

Industrial plugs, sockets and portable power distribution for factories, construction sites, workshops, events and temporary power. Connectors follow the IEC 60309 system for safe, non-interchangeable connections.

Heavy-duty connector with pilot contacts

Industrial Plugs & Sockets

Cable plugs, couplers and wall or panel-mounted sockets in IP44 splash-proof and IP67 watertight versions.

SPECIFY Current, voltage, poles, IP rating, mounting

Heavy-Duty Connectors

Metal-bodied, high-current connectors with pilot contacts for heavy equipment and temporary power distribution.

SPECIFY Current, poles, pilot contacts

Hensel cable reel with PCE sockets

Socket Boxes

Weatherproof socket combinations with MCB or RCCB protection, built in Hensel enclosures with PCE sockets.

SPECIFY Socket mix, protection, enclosure

Cable Reels

Portable reels with industrial and domestic sockets for site, maintenance and event use.

SPECIFY Cable size and length, socket mix

IEC 60309 COLOUR CODING

YELLOW

100–130 V

3-pin shown

BLUE

200–250 V

3-pin shown

RED

380–480 V

5-pin shown

Socket colour indicates the operating voltage; pin count and earth-contact position prevent mismatched connections.

CATEGORY 10

Custom Fabrication & Project Supply

10

Project-specific assemblies and consolidated supply built around client drawings, specifications and BOQs, using enclosures, switchgear and components from established manufacturers.

Socket distribution assembly — wired, sleeved and labelled to drawing

SCOPE OF CAPABILITY

Assemblies are configured to the client's approved drawings and component makes.

Scope, build arrangement, testing and any certification requirements are agreed at the enquiry stage. Not every requirement is manufactured in-house; specialised items are produced through qualified fabrication partners.

Custom Junction Boxes

Junction and terminal boxes with specified entries, terminals and mounting.

ACDB / DCDB Assemblies

Built to the approved SLD for solar and LT distribution.

Socket & Panel Enclosures

Distribution and socket boards in weatherproof enclosures, wired and labelled.

Project-Specific Poles

Pole heights, brackets and base arrangements to approved drawings.

Consolidated Project Supply

Single-point supply of mixed BOQ items across categories, with coordinated dispatch.

HOW A PROJECT ENQUIRY WORKS

1 SHARE	2 REVIEW	3 OFFER	4 APPROVE	5 SUPPLY
Drawing, SLD, specification or BOQ	Technical clarifications and make selection	Proposed makes, configuration and price	Client approval of drawings and makes	Build or procure, inspect and dispatch

Share your drawing, SLD or BOQ for a project-specific offer.

WHY ELECTRIKA INC.

Why work with Electrika Inc.

25+

Years of experience

Supplying industrial electrical goods since 1999, with deep domain knowledge of industrial power distribution.

18

Authorised & associated brands

Products sourced from established manufacturers, supplied as genuine items through manufacturer channels.

10

Product categories

From cables and switchgear to poles and flameproof equipment, consolidated under one supply partner.

1

Point of contact

One team for selection, quotation, coordination and after-sales support across your BOQ.

OUR APPROACH

1. **Architect collaboration**
   Direct planning alongside project architects, consultants and interior designers.
2. **Power load analysis**
   Mapping socket load needs, phase distribution and peak consumption.
3. **Schematic re-planning**
   Converting raw layouts into optimised power distribution plans.
4. **Verified supply**
   Supplying genuine raw materials, conduits and switchgear from approved makes.

Support after supply. On-time delivery, competitive pricing and dedicated support remain the basis of the long-term relationships we build with every client.
